MAINTENANCE OF REDUCTION WITH A SPLINT DESIGNED BY T. G. BARLOW, M.D. RESULTED IN UNIFORMLY GOOD RESULTS...

The Barlow Cruciform Splint is made of two aluminum strips 22" long, riveted together 9" from the head ends. Padded and with a strap, the splint is readily affixed and may be retained in position throughout treatment. 90° flexion and 90° abduction has been found to be successful in treating all suspected cases, and no recurrence of dislocation has been recorded. Clinical data referenced is from 1962 through 1964.

Write for Factsheet No. 25
The Journal is published in twelve monthly numbers. The eight American numbers are issued on January 1, March 1, April 1, June 1, July 1, September 1, October 1, and December 1; and the four British numbers are issued on February 1, May 1, August 1, and November 1. The subscription price, payable in advance, for the four British numbers is £2.13.6 (7.50 dollars), and for the eight American numbers $5.4.0 (14.50 dollars). The subscription price for both British and American volumes is £7.17.6 (22 dollars).

PRESIDENTIAL BADGE OF THE SOUTH AFRICAN ORTHOPAEDIC ASSOCIATION

The design on the front cover of this issue represents the Presidential Badge of the South African Orthopaedic Association which is in white and yellow gold showing the central design of the twisted trunk being made straight, adapted from the illustration in Andry’s Orthopaedia. The distinguishing features of this jewel of office are the clasp which bears a protea, the South African indigenous flower, and at the bottom of the badge the head of a springbok, the gazelle which is South Africa’s national emblem.
